

ALEX ILLARIONOV

Staff Frontend Engineer

the-illarionov.com linkedin.com/in/the-illarionov the.illarionov@gmail.com +77051797365 Almaty, Kazakshtan

I'm a staff frontend engineer with 13 years of development experience.

In 2016 i founded a startup and left it in 2022.

SKILLS

Frontend: Nuxt 3, Vue 3, Tailwind, Typescript, Vitest, Playwright, Vanilla Javascript, HTML, CSS.

Backend: Nodejs, Strapi, Laravel.

Devops: Docker, Github Actions, Gitlab CI/CD, Ubuntu Server, Cloudflare.

EXPERIENCE

Frontend Team Lead, [AGIMA](#), Jan 2023 - Present (1 year 4 month).

- Led 10 frontend developers to finish 3 projects with total cost of \$400,000 (mentorship, code review).
- Convinced management to refine the development flow which reduced the cost of development by 10%.
- Redesigned the hiring process, lowered the total amount of applications and increased the quality of it.
- Made 5 presale presentations to the possible clients, 4 of which were successful.
- Convinced client to use "ultra" JAMstack even without backend.

Founder, [Alex Illarionov IT School](#), Sep 2016 - May 2022 (5 years 9 months).

- Hired 6 people without any work experience and raised them into leaders.
- Graduated 2500 students.
- Created custom training methodology and increased the course completion rate to 80% (the market average is 30%).
- Built partnership network with public schools.
- Completed the pre-acceleration program at the European accelerator Startup Wise Guys.
- Led a remote team of 9 developers to create a custom Learning Management System.

Frontend developer, [Alpari](#), Jan 2010 - Sep 2014 (4 years 9 months).

- Wrote a prototype of MVC-framework, which allowed the reuse of components on multiple company sites.
- Convinced my director to use BEM methodology, which reduced the time of launching new pages by 25%.
- Made 2 presentations on behalf of the company at frontend conferences.

PROJECTS

[The Supersonic Plugin For Scroll Based Animation.](#)

2kb javascript plugin for scroll based animation which animates 1000 elements without lags!

[The Superawesome Frontend Boilerplate.](#)

My Vue frontend starter with tests, CI/CD, backend - everything dockerized, don't even need nodejs locally!

Also with a styleguide for large-scale frontend projects!
